

As the market leader in inventory automation, PAR Excellence has been supporting health care supply chains for almost 30 years.

Our integrated hardware and software solution revolves around a weight-based, open-architecture point-of-use design that provides customers with unparalleled flexibility and efficiency. By eliminating the daily need for cycle counting, and by providing real time inventory updates and automated requisitions, PAR Excellence's technology enables Vizient members to optimize their most valuable resource... **their people.**

PAR Excellence is a US-based, vertically integrated design and manufacturing operation committed to the advancement of inventory and workforce management solutions for healthcare providers.

Contact us today to learn more about PAR Excellence and how we can help modernize your supply chain operation.
